### **Methodology**

### Participating Countries 2013

- Representative samples of 1,000 adults per country in 26 countries (*n*=27,312).
- · Some urban-only surveying in certain developing countries.
- Face-to-face and telephone interviewing between December 2012 and April 2013.
- Within-country sample error of +/-2.8 to 4.9 per cent, 19 times out of 20.
- All figures in the charts are expressed in percentages, unless otherwise noted.

### **Key findings**

- Though the clothing industry's CSR performance is viewed as middling, its net performance rating has fallen since 2011, continuing a long term decline.
- In no country is the clothing industry the top ranked CSR performer, though perceptions do vary widely across countries.
- Though the industry's perceived performance has improved in some countries since 2011, it has fallen in many others, particularly Asian and Western ones. This may be linked to high profile supply chain issues.
- In general, the industry's CSR efforts are much more favourably perceived in developing nations compared to developed ones.
- Nine per cent of respondents said, unprompted, that they would like to see more socially responsible clothes, more than said the same about cigarettes. This proportion has risen in the past two years.

## Clothing industry's CSR performance is middling compared to other industries

#### CSR Performance of Industry Sectors

Average of 23 Countries,\* 2013

R13\_23\_likert

The white space in this chart represents "Depends," "No opinion," and "DK/NA."

\*Includes Argentina, Australia, Brazil, Canada, Chile, China, France, Germany, Ghana, Greece, India, Indonesia, Kenya, Mexico, Nigeria, Pakistan, Peru, Russia, South Korea, Spain, Turkey, UK, and USA

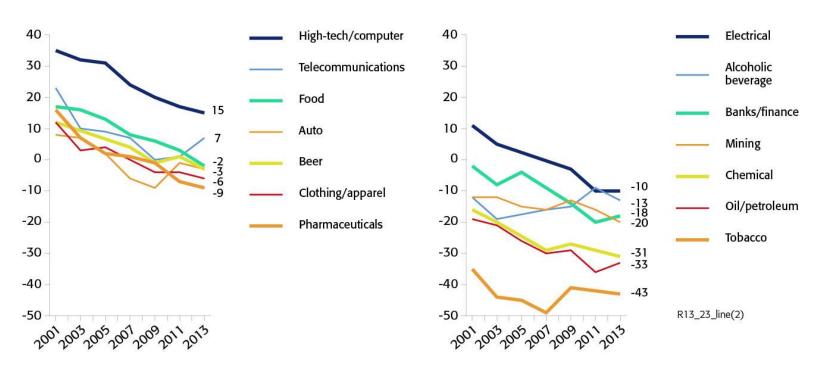

### Clothing industry's CSR perception reaches new low

#### **CSR Performance of Industry Sectors**

Net,\* Average of 11 Countries,\*\* 2001–2013

<sup>\*&</sup>quot;Among the best" and "Above average" minus "Below average" and "Among the worst"

The following sectors were not asked in France in 2005: telecommunications, banks, auto, chemical, electrical, beer and alcoholic beverage. Telecommunications, banks/finance not asked in France in 2006.

<sup>\*\*</sup>Includes Australia, Canada, Chile, China, France, Germany, Mexico, Russia, Turkey, UK, and USA

## Wide variation in perceptions of clothing industry's CSR performance

### Global Societal Context to Inform Decisions & Strategy

Global organizations need greater insight on how to better manage risks and capitalize on opportunities in uncertain times, build trust with their stakeholders and society, and exert a greater influence in shaping their external context.

GlobeScan Radar is a program of evidence and insights for informing decision-making and strategic direction. Radar draws upon GlobeScan's unique database of over a decade of global public opinion tracking (20-30 countries annually) around business and its role in society.

A partnership with GlobeScan through Radar provides you and your team with access to briefings and data, insight from societal trends on how companies are living up to public expectations, and how your peers in other sectors are handling potential threats to their reputation.

A GlobeScan Radar briefing will give you a comprehensive understanding of the social context in which your business operates around the world to guide communications, issues management, and initiative development. Through performance ratings, it will help you identify how views of your sector are changing, and which sectors and businesses are the emerging leaders and laggards.
